LIVINGSECURITYSOLUTION

GRUPPO ESSE

We are a group of professionals in the field of security, which through technology and research has created a wide range of high quality products with a functional and elegant design.

Our high production standards, compliant with international standards and guaranteed by numerous registered patents, allow us to provide security grilles and roller shutters with a high burglar resistance class.

Attention to detail, quick order management and control of production guarantee a complete service ranging from research to the design, from realization to distribution, and from consultation to customer support.

THORAX is the **armoured roller shutter**, in extruded aluminium with a **modern design**, functional and easy to install.

CLASS RC 5
CLASS RC 4
ACCORDING TO THE EUROPEAN STANDARDS
UNI EN 1627:2011
UNI EN 1628:2011
UNI EN 1630:2011

THORAX is produced in three versions:

SuperBlind

Class 5 high-resistance armoured rolling shutter, with motorized blind and sunshade with a 3 cm slat gap.

EcoBlind

Class 4 high-resistance armoured rolling shutter, which does not require any masonry work, with motorized blind and sunshade with a 1 cm slat gap.

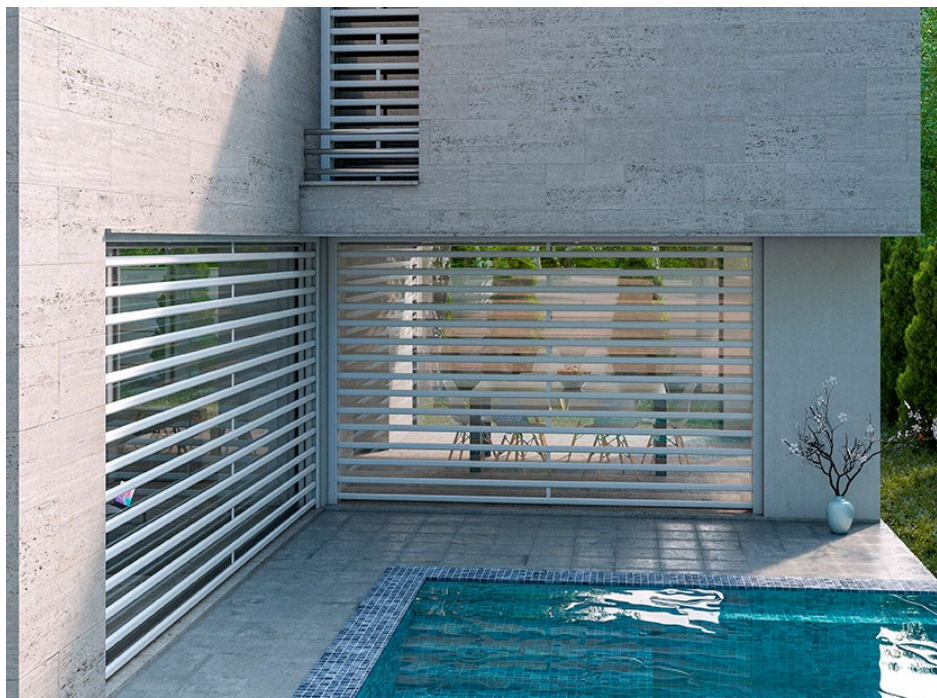

FastBlind

Class 4 high-resistance armoured rolling shutter, which does not require any masonry work, with motorized blind and sunshade with a 2 cm slat gap.

The space between one slat and the other illuminates the environment without having to lift the shutter and without losing your privacy while remaining safe.

SICURBLIND is a retractable vertical anti-intrusion system, which meets the needs of security, comfort and design.

CLASS RC 5
CLASS RC 4
ACCORDING TO THE EUROPEAN STANDARDS
UNI EN 1627:2011
UNI EN 1628:2011
UNI EN 1630:2011

The certified and guaranteed quality, and the elegant and essential design take shape in **SICURBLIND**, a retractable security grill with a vertical packaging.

SICURBLIND is the only retractable grill that was awarded the class 4 of burglar resistance, after having passed successfully the manual burglary resistance test and the test of resistance under static load.

Contemporary, discreet, elegant, characterized by lean and essential lines, combined with surfaces inspired by the simplest geometric shapes, which do not invade the inhabited environments.

A simple click is all it takes to make **SICURBLIND** grilles invisible with push-button, radio-control or home automation systems without being a slave to your own security.

LIGHT AND SHADOW A QUESTION OF BALANCE

BRISOLÈ is the rolling shutter with sunscreen function that allows optimal management of ambient lighting and air changes.

BRISOLÈ is produced in three versions:

AIR ONE

with the characteristic distance of 1 cm between one slat and the other is ideal for those who want to combine privacy, design and a marked solar shading.

AIR TWO

with the characteristic distance of 2 cm between one slat and the other is ideal for those who want to add a balance between light and shadow to the design.

AIR THREE

with the characteristic distance of 3 cm between one slat and the other is ideal for those who want to combine privacy with lighted and ventilated environments.

Light, privacy, design, shadow and air are all words that lead back to the possibilities offered by **BRISOLÈ**. The beauty of this line of sun blinds is added to the robust aluminium extrusions of 10 kg / sq. m. which make it a better anti-intrusion solution rather than a traditional roller shutter.

IMPAKBLIND®

retractable armoured grating with **horizontal packing**

IMPAKBLIND is a solution designed for the passive protection of domestic environments, while at the same time providing the possibility to free the passageway when needed.

CLASS RC 3

ACCORDING TO THE EUROPEAN STANDARDS

UNI EN 1627:2011

UNI EN 1628:2011

UNI EN 1630:2011

IMPAKBLIND can be chosen among three models:

COLLECTION IN LIGHT

model that leaves the collected package in sight and does not require masonry work.

REVOLVING COLLECTION PACK

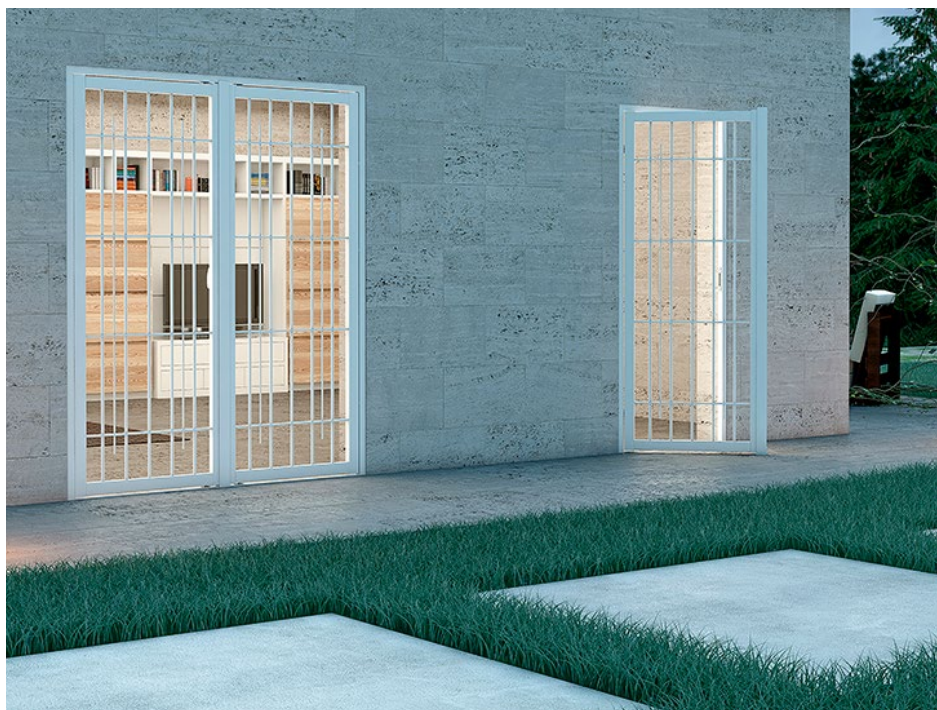

model that allows the collecting pack to lie down along the wall and does not require masonry work.

RETRACTABLE COLLECTION PACK

model that allows the collecting pack to leave the entire width of the wall hole free thanks to a counter frame inside the wall.

TANK is the traditional security grill, brought to an unmatched level of excellence.

CLASS RC 4
ACCORDING TO THE EUROPEAN STANDARDS
UNI EN 1627:2011
UNI EN 1628:2011
UNI EN 1630:2011

To protect your serenity, your home and your possessions, there is **TANK**, the hinged security grill, versatile and easy to install.

Sturdy, to guarantee maximum safety, with attention to detail and design to make it comfortable and suitable for any architectural context.

Thanks to the use of steel, both for the structure and for the accessories, and to applied innovative technology, the **TANK** grill is burglar-proof class 4 certified.

TANK has 6 specific configurations:

TANK LINEAR - TANK DECOR - TANK FOLD

TANK EASY - TANK LIGHT LINEAR

TANK LIGHT DECOR

The **BUNKER** armoured shutter has been designed to be a perfect barrier against unwanted “visits”.

CLASS RC 4
ACCORDING TO THE EUROPEAN STANDARDS
UNI EN 1627:2011
UNI EN 1628:2011
UNI EN 1630:2011

The design embraces the traditional shapes in a contemporary way, providing an essential armoured shutter.

The most vulnerable points affected during burglary attempts are hinges and locks. In **BUNKER** they are inviolable.

Made of FE360 ferrous steel and equipped with important safety accessories, **BUNKER** offers class RC4 protection.

It is made with one or more doors and with different opening systems.

The protective surface treatments, combined with the painting in modern installations, allow **BUNKER** to maintain pleasant appearance and safety for a long time.

PANZER, the grill combined with a shutter is designed to put together the strength of the armoured systems Tank and Bunker.

CLASS RC 4
ACCORDING TO THE EUROPEAN STANDARDS
UNI EN 1627:2011
UNI EN 1628:2011
UNI EN 1630:2011

Double safety characterized by the lines that distinguish all our systems, with the coplanarity of the door with both internal and external frames and retractable hinges.

Inviolable from the outside with tools such as screwdrivers, hammers, pincers, crowbars, hand saws, electric drills.

Thanks to the use of steel, both for the structure and for the accessories, and to applied innovative technology, the **PANZER** grill is burglar-proof class 4 certified.

PANZER represents the security you can't give up today.
